

## ES Cell Protocols

	<u>Page</u>
Gelatinizing Dishes/Plates	2
Primary Mouse Embryonic Fibroblast Preparation	3
Expanding Feeders from p2 MEFs	5
Harvesting MEFs	6
Irradiation of MEFs	7
Plating Feeders	8
Bringing up ES Cells from LN <sub>2</sub> Storage	9
Splitting ES Cells	10
Freezing ES Cells	11
Counting Cells	12
Targeting Vector Preparation for Electroporation	13
Electroporation of Mouse Embryonic Stem Cells	15
Selection Protocol for Gene Targeting	17
Picking Colonies	18
96-Well Plate Split/Freeze	19
96-Well Plate DNA Preparation	21
Gels and Southern Blots	23
Southern Protocol for Zeta Probe Membrane	26
Expansion of Individual Clones	28
DNA Lysis, Extraction and Isolation from ES Cells	29
Preparation of ES Cells for Blastocyst Microinjection	31
Recombinase Mediated Cassette Exchange (RMCE)	32
24-Well Plate DNA Preparation	34

## ES Cell Reagents and Recipes

Gelatin	36
ES Cell Reagents/Sources	37
Embryonic Stem Cell Culture Media (cES)	39
Freezing Media	40
ES Cell Lysis Buffer	41
Reagents for Gels and Southernns	42
DNA Preparation Reagents	44
