Human pancreatic cultures - Study GBCO710**Genomics Study Specifications**

Study Name	Human pancreatic cultures
Contact Name	Susan Bonner-Weir (Harvard University)
Publication	Not provided
My Strategies	Return to My Strategies page
Classification	Cell differentiation; Differentiation of insulin-producing cells
Links	Biomaterials Graph ArrayExpress
BCBC Release Date	December 15, 2003
Public Release Date	December 15, 2003
Citation	unavailable

Synopsis

Study Description	Goals	
Approaches	Results	Conclusions
Related Studies		

Human pancreatic cultures: 3 time points for 4 pancreases, and 2 of subpopulations for each of two other pancreases.

Platform types	Expression microarray, Expression
Platforms	Show platform Affymetrix HG_U95A
Study Design Type	<ul style="list-style-type: none"> development_or_differentiation_design growth_condition_design
Study Factors	Show study factors
Study Assays	Show study assays

Access to Study Data

This Study Data is publicly available to all users.

Gene List(s)

Use the following form(s) to refine the parameters and add the gene list to a strategy:

Expanded versus Initial Adherent - Human Islet Cultures	
Fold Change Greater Than:	<input type="text" value="1.5"/>
Confidence Level:	High Confidence <input type="radio"/> All Results <input checked="" type="radio"/>
<i>For a microarray experiment a result with high confidence has a confidence level of at least 80%.</i>	
<i>For a ChIP-chip experiment a result with high confidence has a confidence level of at least 90% and all fold changes are positive.</i>	
Reference (Denominator):	initial adherent
Find Genes	
▶ Differentiated versus Initial Adherent - Human Islet Cultures	
▶ Differentiated versus Expanded - Human Islet Cultures
