Antibody Information

- **Antibody ID:** AB2193
- **Antigen:** Pancreatic duct cells
- **Type:** Monoclonal
- **Isotype:** IgM
- **Immunogen Source:** Enriched pancreatic islets
- **Raised In:** Mouse
- **Peptide:** Not provided
- **Source of Antigen:** Human
- **Cross Reacts With:** Human
- **Affinity Purified:** Supernatant
- **Purity Details:** Not provided
- **Positive Control:** Acetone fixed frozen sections of adult human pancreas
- **Notes:** The monoclonal antibody HPd2 is derived from hybridoma DHIC3-5H10. The monoclonal antibody selectively reacts with human ductal cells in human pancreas. Mice were immunized with enzyme-dispersed enriched islets. These cell preparations contain low levels of contaminating exocrine and ductal cells. These antibodies are currently being characterized. As such, the information included here should be considered preliminary data. It is requested that users of this antibody share data with provider as a mechanism to rapidly assist in antibody characterization.

Applications and Uses
